PROFESSIONAL SUMMARY

Aspiring Machine Learning Engineer with hands-on experience in Machine Learning, Deep Learning, and Generative AI through projects, internship, and hackathons. Worked on RAG-based application, semantic search using Python, FAISS, LangChain, and LLM. Interested in building practical AI solutions and exploring advancements in Machine learning and Generative AI.

WORK EXPERIENCE

GenAI Developer Intern | Technocolabs Softwares

Feb 2026- Apr 2026

- Built and deployed an end-to-end RAG-based HR compliance assistant using LLMs, FAISS vector search, and prompt engineering, improving response relevance by 35% and enabling intelligent enterprise document retrieval
- Implemented semantic search pipelines with token chunking, embeddings, and metadata filtering, reducing document retrieval latency by 40% and improving contextual response accuracy for unstructured HR documents
- Developed scalable Flask REST APIs and an interactive Streamlit interface for real-time document ingestion and AI-driven responses.

Consultant L1 | Mastek Ltd

May 2022- Sep 2025

- Designed and automated enterprise analytics dashboards and reporting workflows, reducing manual reporting effort by 60% and enabling real-time business insights for HCM operational decision-making
- Optimized SQL queries, data pipelines, and reporting processes, improving dashboard performance and data processing efficiency by 45% while enhancing large-scale data handling reliability
- Resolved complex production data issues, collaborated with cross-functional teams to deliver data-driven business solutions

Project Intern | Evolutionary Systems Pvt Ltd

Jan 2022 – Apr 2022

- Developed a business trip request system with multi-level approval workflow, reducing manual approval effort by 50%
- Designed backend logic and implemented data handling for ERP use case
- Built analytics dashboard and reporting features for decision-making

Teaching Assistant | Nirma University

Dec 2020 – Dec 2021

- Assisted professors in delivering course material, grading assignments, taking attendance, and research paper formatting and modifications

PROJECTS

Blockchain-assisted healthcare insurance fraud detection using ensemble learning | Machine Learning Project

- Built an ensemble fraud detection model using Bagging and Stacking on healthcare datasets, achieving 98.6% AUC and outperforming SVM and Random Forest
- Integrated blockchain-based smart contracts to enhance security and automate fraud detection and alerting in healthcare claims systems

Hyperspectral Image Classification using Semi-Supervised Learning | Machine Learning Project

- Developed semi-supervised CNN with label propagation for hyperspectral image classification, achieving 93% accuracy.
- Implemented Centered Kernel Alignment (CKA) for similarity-based label spreading on limited labeled data from the Salinas dataset.

TECHNICAL SKILLS

Programming Languages

Python, C, Java, Oracle SQL, PHP, Solidity

Machine Learning

Supervised & Unsupervised Learning, Ensemble Methods, Model Evaluation, EDA

Deep Learning & NLP & LLM

CNN, Sequence Models, RAG, Prompt Engineering, Transformers, Text Embeddings, Vector Database

Data & Visualization

Tableau, OTBI, BI Publisher, HCM Extract

Tools/Framework

Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, FAISS, Flask, Streamlit, LangChain, Google Colab, Latex, Tensorflow, PyTorch, Hugging Face Transformers, Docker

Other

HTML, CSS, JavaScript, React, FastAPI, REST APIs, Data Preprocessing, Statistical Analysis

EDUCATION

M.Tech – Computer Science and Engineering

Nirma University, Ahmedabad, Gujarat | May 2022 | 8.1 CGPA

B.Tech – Computer Engineering

G.H.Patel College Of Engineering and Technology, Vallabh Vidyanagar | May 2017 | 7.41 CGPA

PUBLICATION

- Blockchain-assisted healthcare insurance fraud detection framework using ensemble learning** Elsevier March 2025
- Blockchain and AI-Empowered Healthcare Insurance Fraud Detection: an Analysis, Architecture, and Future Prospects** IEEE July 2022

CERTIFICATION

- Oracle Cloud Infrastructure 2024 Generative AI certified Professional oracle university
- Fundamental of deep learning NVIDIA
- Sequence models Coursera
- Web development InternShala

ACHIEVEMENTS

- 2nd Place Winner, Hack2Skill Tech Camp: Building Interactive Chatbots with React.js and GPT API**
- Awarded the Bright Spark Award at Mastek for consistently delivering creative solutions and contributing to team success**
